Report on the progress made in attaining the goals of the wellness policy (REQUIRED):

New Horizon School has made steady progress toward implementing the goals outlined in the local school wellness policy. The school continues to support student health through nutrition education aligned with state standards, promotion of healthy food choices, and opportunities for physical activity throughout the school day. Students have access to nutritious meals that meet federal guidelines, free drinking water during meals and throughout the school day, and safe, clean eating environments.

Physical activity opportunities are provided through physical education classes, recess, classroom activity breaks, and extracurricular programs. Efforts are made to encourage lifelong physical activity and to ensure that physical activity is not used or withheld as a form of punishment. Staff members support wellness initiatives by modeling healthy behaviors and participating in professional development as required.

New Horizon School continues to communicate wellness information to families and encourages community involvement to strengthen wellness efforts. Ongoing review of policy implementation helps identify areas of strength as well as opportunities for improvement. Moving forward, the school will continue to build upon existing practices, increase stakeholder engagement, and explore additional strategies to further support student wellness and create a healthy school environment for all students.
